SURFACE AND COATINGS TECHNOLOGY VOLUME 60, NUMBERS 1–3, OCTOBER 8, 1993

Contents

THIN FILM CHARACTERIZATION

Microstructural and magnetic studies of the interfaces in sputtered metal/carbon and metallic multilayer films 379
C. Sella (Meudon, France), M. Maaza (Gif-sur-Yvette, France), M. Miloche, M. Kaabouchi and R. Krishnan (Meudon, France)

Investigation of PA-CVD of TiN: relations between process parameters, spectroscopic measurements and layer properties 385
K.-T. Rie, A. Gebauer and J. Woehle (Braunschweig, Germany)

Decorative hard coatings: interdependence of optical, stoichiometric and structural properties 389
U. Beck, G. Reiners (Berlin, Germany), U. Kopacz (Hanau, Germany) and H. A. Jehn (Schwäbisch Gmünd, Germany)

Determination of mechanical properties of thin films: a theoretical feasibility study 396
N. Schwarzer, F. Richter and G. Hecht (Chemnitz, Germany)

Fracture mechanics tests for measuring the adhesion of magnetron-sputtered TiN coatings 401
D. Müller, Y. R. Cho, S. Berg and E. Fromm (Stuttgart, Germany)

Structural analysis of thermal oxide layers grown on Zircaloy-4 established with the help of chemically homogeneous sputter-deposited Zr–O thin films 405
X. Iltis, B. Stauder, H. Michel and C. Frantz (Nancy, France)

Structural analysis of sputtered $(W–C)_{1-x}M_x$ ($M \equiv Fe,Co$) films with $0 \leqslant x \leqslant 0.20$ 411
A. Cavaleiro, B. Trindade and M. T. Vieira (Coimbra, Portugal)

Metallurgical study of low-temperature plasma carbon diffusion treatments for stainless steels 416
D. B. Lewis (Sheffield, UK), A. Leyland, P. R. Stevenson (Hull, UK), J. Cawley (Sheffield, UK) and A. Matthews (Hull, UK)

HARD COATINGS

On the stress in plasma-deposited a-SiC:H films 424
F. H. M. Sanders (Eindhoven, Netherlands)

Influence of substrate material and deposition parameters on the structure, residual stresses, hardness and adhesion of sputtered Cr_xN_y hard coatings 428
W. Herr, B. Matthes, E. Broszeit (Darmstadt, Germany), M. Meyer and R. Suchentrunk (Munich, Germany)

Optimization of the surface mechanical strength of AISI 316L physically vapour deposited nitrogen-doped coatings on AISI 316L substrates 434
A. Darbeïda, A. Saker, A. Billard and J. von Stebut (Nancy, France)

PVD hard coatings on prenitrided low alloy steel 441
H.-J. Spies, K. Hoeck (Freiberg, Germany), E. Broszeit, B. Matthes and W. Herr (Darmstadt, Germany)

Influence of coating thickness on tool life and wear 446
M. Kupczyk (Poznań, Poland)

Structure and properties of multicomponent and multilayer hard coatings obtained by the bias activated reactive evaporation method 450
J. Markowski, A. Prajzner, J. Zdanowski (Wroclaw, Poland) and K. Masseli (Kassel, Germany)

Mechanical properties of amorphous and polycrystalline multilayer systems 454
I. Barzen, M. Edinger, J. Scherer, S. Ulrich, K. Jung and H. Ehrhardt (Kaiserslautern, Germany)

Surface mechanical strength optimization of ZrO_2 physical vapour deposition coatings 458
J. von Stebut, S. Febvay, B. Stauder, J. Lepage (Nancy, France), J. M. Brion, B. Sander and G. Pierson (Annéville, France)

Production and characterization of Si–N films obtained by r.f. magnetron sputtering 463
A. Oliveira, A. Cavaleiro and M. T. Vieira (Coimbra, Portugal)

TiN

An interface study of various PVD TiN coatings on plasma-nitrided austenitic stainless steel AISI 304 468
J. D'Haen, C. Quaeyhaegens, G. Knuyt, L. De Schepper, L. M. Stals and M. Van Stappen (Diepenbeek, Belgium)

TiN and CrN PVD coatings on electroless nickel-coated steel substrates 474
A. Leyland, M. Bin-Sudin, A. S. James, M. R. Kalantary, P. B. Wells, A. Matthews (Hull, UK), J. Housden and B. Garside (Cambridge, UK)

Exceptions to the microstructure zone model revealed by the reactive d.c. magnetron sputter deposition of δ-TiN_x thin films 480
V. Poulek, C. Quaeyhaegens, G. Knuyt, L. Stals and V. Fagard (Diepenbeek, Belgium)

Relation of deposition conditions of Ti–N films prepared by d.c. magnetron sputtering to their microstructure and macrostress 484
J. Musil, V. Poulek, V. Valvoda, R. Kužel, Jr. (Prague, Czech Republic), H. A. Jehn and M. E. Baumgärtner (Schwäbisch Gmünd, Germany)

Reactivity of nitrogen in titanium nitride film formation by the reactive ion plating process 489
Y. Matsumura, T. Chujo, H. Uchida and H. H. Uchida (Kanagawa, Japan)

BORON NITRIDE

Electron cyclotron resonance plasma deposition of cubic boron nitride using *N*-trimethylborazine 493
A. Weber, U. Bringmann, R. Nikulski and C.-P. Klages (Hamburg, Germany)

Electron-assisted hot-filament chemical vapour deposition of E-BN layers 498
A. Michalski and A. Olszyna (Warsaw, Poland)

Characterization of mixed-phase BN thin films deposited by plasma CVD 502
M. Z. Karim, D. C. Cameron and M. S. J. Hashmi (Dublin, Ireland)

Investigation of gas phase mechanisms during deposition of diamond films 506
R. Beckmann, S. Reinke, M. Kuhr, W. Kulisch and R. Kassing (Kassel, Germany)

TRIBOLOGICAL COATINGS

Solid lubrication by low friction surfaces 511
G. Sørensen (Aarhus, Denmark)

Low friction composite coating of Cr_xSi_y/MoS_2 on steel 515
D. Kraut, G. Weise (Dresden, Germany), W. Olbrich and G. Kampschulte (Stuttgart, Germany)

Improvement of tribological properties by ion implantation 521
A. Gervé (Karlsruhe, Germany)

Deposition of wear resistant coatings based on diamond like carbon by unbalanced magnetron sputtering 525
D. P. Monaghan (Salford, UK), D. G. Teer, P. A. Logan (Kidderminster, UK), I. Efeoglu and R. D. Arnell (Salford, UK)

AUTOMOTIVE APPLICATIONS

Metal–carbon layers for industrial application in the automotive industry 531
J. Güttler (Stuttgart, Germany) and J. Reschke (Dresden, Germany)

The deposition of yttria partially stabilised zirconia (PYSZ) onto aluminium alloy substrates using PVD techniques 536
J. Robson, A. S. James, A. Matthews (Hull, UK) and B. Lewis (Sheffield, UK)

Cylindrical magnetron sputtering for the production of wear-resistant and durable overlays of uniform thickness for journal bearings for application in high performance combustion engines 541
J. Holland and A. Linnenbrügger (Clausthal-Zellerfeld, Germany)

CORROSION RESISTIVE LAYERS

Corrosion properties of selected Cr-based hard and protective coatings 545
I. Milošev and B. Navinšek (Ljubljana, Slovenia)

The dependence of hardness and corrosion protection power of ion-beam-assisted deposition TiN coatings on the ion beam impact angle 549
R. Hübler (Porto Alegre, Brazil), L. Alberts (Poitiers, France) and G. K. Wolf (Heidelberg, Germany)

Corrosion and wear properties of multipurpose coatings deposited by ion-beam-assisted deposition 556
B. Enders, H. Martin and G. K. Wolf (Heidelberg, Germany)

Plasma and ion-beam-assisted deposition of multilayers for tribological and corrosion protection 561
R. Hübler (Porto Alegre, Brazil), A. Schröer, W. Ensinger, G. K. Wolf (Heidelberg, Germany), W. H. Schreiner and I. J. R. Baumvol (Porto Alegre, Brazil)

$SiC–Si_3N_4$ composite coatings produced by plasma-enhanced chemical vapour deposition 566
J. Gerretsen, G. Kirchner (Eindhoven, Netherlands), T. Kelly, V. Mernagh (Dublin, Ireland), R. Koekoek (Hoogeveen, Netherlands) and L. McDonnell (Cork, Ireland)

Optical properties and corrosion behaviour of sputtered Zr–B and Zr–B–N coatings 571
A. Übleis (Schaan, Liechtenstein), C. Mitterer and R. Ebner (Leoben, Austria)

Corrosion resistance of amorphous hydrogenated SiC and diamond-like coatings deposited by r.f.-plasma-enhanced chemical vapour deposition 577
C. Sella, J. Lecoeur (Meudon, France), Y. Sampeur and P. Catania (Le Coudray Montceaux, France)

FILMS FOR SPECIAL APPLICATIONS

Soft physical vapour deposition coatings—a new coating family for high performance cutting tools 584
J. Rechberger (Bern, Switzerland) and R. Dubach (Vallorbe, Switzerland)

Application of microwave plasma to the oxidation of ceramic material under conditions of atmospheric re-entry 587
M. Balat (Odeillo, France), P. Peze (Toulouse, France), M. Lebrun and G. Olalde (Odeillo, France)

An improved method for the deposition of corrosion-resistant aluminium coatings for aerospace applications 592
D. P. Monaghan (Salford, UK), D. G. Teer, P. A. Logan, K. C. Laing (Kidderminster, UK), R. I. Bates and R. D. Arnell (Salford, UK)

The deposition and analysis of pyrotechnic devices deposited by magnetron sputtering 597
P. J. Kelly, S. F. Tinston and R. D. Arnell (Salford, UK)

Ni–Cr–Ti protective coating 603
B. Navinšek (Ljubljana, Slovenia)

Dielectric and semiconducting Ge–C and Si–C thin films prepared by plasma deposition from organic compounds 609
J. Tyczkowski, P. Kazimierski and E. Odrobina (Lodz, Poland)

ECONOMIC AND ENVIRONMENTAL ASPECTS

Economic and ecological aspects of plasma surface engineering 613
R. Grün (Siegen, Germany)

Environmental aspects of physical vapour deposition processes 619
F. Löffler (Aachen, Germany)

Large-scale antireflective coatings on glass produced by reactive magnetron sputtering 624
S. Beißwenger, G. Bräuer, W. Dicken and J. Szczyrbowski (Hanau, Germany)
